## DETAILED ACTION

### ***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-12 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In claims 1 and 10, applicants recite that up to 50mol% of the basic constitutional units of  $-\text{[SiR}^1(\text{NR}^2)_{1.5}]$ - is replaced by a linking group other than the silazane bond. It is not clear to the Examiner what applicants mean by this limitation. Are applicants saying that the repeating units of  $-\text{[SiR}^1(\text{NR}^2)_{1.5}]$ - are being interrupted by another repeating unit such as the one of formula (I) or (II) (i.e., is the repeat unit of formula (I) or (II) being located in *between* the repeating units of  $-\text{[SiR}^1(\text{NR}^2)_{1.5}]$ - )? Or, are saying the linking group is being inserted *within* a repeating unit of  $-\text{[SiR}^1(\text{NR}^2)_{1.5}]$ -?

Appropriate clarification or correction is required.

### ***Double Patenting***

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422

F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

4. Claims 1-12 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-6, 8-11, 14 and 15 of copending Application No. 10/524,527. Although the conflicting claims are not identical, they are not patentably distinct from each other because of the following reasons:

Claim 1 of App.'527 states the following;

1. A photosensitive composition for an interlayer insulation film, characterized by comprising: a modified polysilsesquiazane having a weight average molecular weight of 500 to 200,000 comprising basic constitutional units represented by formula  $—[SiR^1(NR^2)_{1.5}]—$  wherein  $R^1$ 's each independently represent an alkyl group having 1 to 3 carbon atoms or a substituted or unsubstituted phenyl group;  $R^2$ 's each independently represent hydrogen, an alkyl group having 1 to 3 carbon atoms, or a substituted or unsubstituted phenyl group, up to 50% by mole of said basic constitutional units having been replaced by a linking group other than the silazane bond; a photoacid generating agent; and a basic material.

Therefore, App.'527 teaches present invention of claim 1. Also, claims 2-6, 8-11, 14 and 15 of App.'527 teach present inventions of claims 2-12.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.
